BEHIND THE LOGO

The reason for the name MegaBeetle was a mixture of ideas between the name Beetle and Mega, to create something resembling Megabyte.

Mega is a word to define something large, something big, we felt this was fitting, considering we work with companies around the world, providing design and IT solutions such as websites.

The Beetle is often associated with traits of Strength, Time, Structure, Creativity, Recycling, Cleanliness, Adaptation, Transformation, Metamorphosis, Resourcefulness among others. All these traits represent what our company is.

We always aim to be a creative team that builds things from scratch or rebrands companies, adapting to their needs and to the company's current image if case, transforming their image into a clean and efficient look that will last through time.

As such, with those goals in mind, MegaBeetle was born.

MEGABEETLE'S IDENTITY

ELEMENTS

MegaBeetle's logo was created with the idea of portraying the aspect of cleanliness while also communicating efficiently through its image, with a goal of making a lasting brand.

The base elements the logo would need would be a Beetle and something related to Megabyte, initially we made a logo with some circuitry coming out from the Beetle's husk but it didn't communicate properly. So we moved to something simpler, using the initials M and B, we designed the beetle to resemble those letters.

The logo reflects the company's stance as a laid back, cool and clean organization, here at MegaBeetle we like to have a good time while doing what we do best, serve our customers with quality services at prices that are affordable.
